# L. RICHARDSON HOSPITAL APARTMENTS

---

If you are 55 or older, you can now make the L. Richardson Memorial Hospital your new home. It was once the best built and equipped hospital in Greensboro at its opening in 1927 and now provides thirty-two distinctive one and two-bedroom apartments. Retaining its straightforward Mission Revival style, this beautifully modernized piece of history offers a unique and special independent living experience.

L. Richardson Hospital brings together, under a single roof, many amenities for active adult living. These include covered porches, a large secure outdoor patio, basement storage, central laundry room and a variety of sitting areas. L. Richardson Hospital also offers an on-site office and an attractively furnished community room on the first floor. Each apartment features one or two bedrooms with living and dining areas as well as a fully equipped kitchen with range, refrigerator, generous cabinetry, central air and ceiling fans in the units.

This property is fully handicapped accessible and has a number of apartments designed specifically for disabled individuals.

Richardson Hospital is convenient to nearby places of worship, the YMCA, one mile from downtown, and only a few blocks away from A&T State University and Bennett College.

To live in this exceptional community, one need not be wealthy.
